

## E-Line Degreaser Product# 1615-16S

### Product Description

Maintenance cleaners clean oil and contaminants off of solenoids, coil windings, metal parts, printed circuit boards, barcode instruments, switch boxes, gearboxes, and engines. Grease and oil flow right off, reducing the time and materials needed to scrub off stubborn soils.

E-Line Degreaser is a non-chlorinated degreaser and electrical cleaner, formulated to be powerful, yet very economical. Eliminate brushing and scrubbing, saving time and materials. This product was originally formulated for the difficult cleaning applications, and is ideal for removing oils, greases and carbon residues from control panels, switch plates, enclosures, motors, and work surfaces in manufacturing finished goods. It exhibits slower evaporation, which allows the solvent to soak in and break down difficult to remove soils. Note: Not for retail sale – for manufacturing use only.

### Features / Benefits

- Ideal for electrical & maintenance cleaning

### Usage Instructions

Disconnect equipment from power source. Make sure opening of sprayhead is pointing toward surface to be cleaned. Hold can 6-8 inches away. Direct spray to saturate soiled surface. A **TechBrush™** (2000 Series) may be utilized to help in the removal of heavy soils. When used as a general cleaner, start at top of area to be cleaned using a sweeping motion and spray the area, slowly working toward the bottom. To clean in hard to reach areas, insert extension tube in sprayhead to direct spray. **Allow components to dry completely before applying current.**
